Assignment 3.2

1. Define matrix mymat by replicating the sequence 1:5 for 4 times and transforming into a matrix, sum over rows and columns

x <- replicate(4,1:5)

print(x)

#Row sum

xsum <- rowSums(x)

print(xsum)

#Column sum

ysum <- colSums(x)

print(ysum)

Rfile (rowsum.R) and screenshot attached
